ASSESSING BENEFICIAL REUSE OF OIL & GAS PRODUCED WATER

Glessner Auditorium

More than 800 billion gallons per year of wastewater are produced from U.S. oil and gas development operations, but need this water be considered a waste? In recent years a significant portion of this water has been recycled into other wells, and there is increasing interest in treating the water for beneficial reuse outside the oilfield. This roundtable will look at ways to assess whether uses of oil and gas produced water are beneficial from an environmental and economic perspective, and also will touch on California's agricultural reuse study.

- ❖ Martha Rudolph, ECOS President and Shale Gas Caucus Co-Chair and Director, Environmental Programs, Colorado Department of Public Health & Environment (moderator and speaker)
